Summary

Computer science student at Brigham Young University-Idaho with experience in Python programming, web development, and algorithm design. Through coursework and personal projects, I have developed strong problem-solving skills and reliable software solutions.

Education

Brigham Young University - Idaho

Computer Science • Rexburg, ID

Technical Skills

Computer languages

- Python
- Html
- CSS

Tools

- Git
- GitHub
- VS Code

Concepts

- Algorithms
 - JSON
 - Input Validation
 - Software Testing
 - Digital Logic
-

Experience

Brigham Young University-Idaho

Student • Rexburg, ID

Present

- Pursuing a Bachelor of Science in Computer Science.
- Developing skills in Python, web development, software testing, and algorithm design.
- Completing nontrivial software development and data processing projects.

Taget

Fulfilment Team Member • Idaho Falls, ID

- Selected and prepared customer orders accurately in a fast-paced retail environment.
- Worked collaboratively with team members to meet fulfillment goals and deadlines.
- Maintained organization and attention to detail while managing multiple tasks.

Gables of Ammon Assisted Living

Caretaker • Ammon, ID

- Assisted residents with daily living activities while maintaining a safe and respectful environment.
 - Demonstrated reliability and punctuality while working scheduled shifts.
 - Communicated effectively with residents and coworkers to provide quality care.
-

Projects

Number of Days Calculator | *Python*

- Designed and implemented a Python program to calculate the number of days between two dates.
- Built input validation for dates, months, years, and leap years.
- Organized the program into reusable functions to improve readability and maintainability.

Selection Sort Implementation | *Python*

- Implemented the selection sort algorithm to organize data loaded from JSON files.
- Used modular functions, assertions, and testing to improve code reliability and correctness.
- Practiced algorithm analysis and debugging while optimizing program organization.

Client Website Project | *HTML, CSS*

- Collaborated with a client to design and build a website based on project requirements and feedback.
- Translated design goals into a functional, user-friendly website while incorporating revisions throughout development.
- Improved communication and project planning skills through iterative development.
